Congenital Anomalies of the Pulmonary Vasculature

I. Aplasia or hypoplasia of a Pulmonary Artery

1. Aplasia or hypoplasia of one pulmonary artery; radiologic and pulmonary function studies. J. M. Fisher, et al, American Heart Journal, 58:26, July, 1959.
2. Isolated congenital absence of the right pulmonary artery: A caution as to its diagnosis and a proposal for its embryogenesis. L. J. Schneiderman, American Heart Journal, 55:772, 1958.
3. Proximal interruption of a pulmonary arch. Case report. P. Adams, et al, Diseases of the Chest, 34:73, 1958.
4. Unilateral pulmonary artery absence or hypoplasia. J. C. Elder, et al, Circulation, 17:557, April, 1958.
5. Congenital absence or hypoplasia of a pulmonary artery. C. A. Bishop, et al, American Surgeon, 24:387, March, 1958.
6. Anomalous artery in intralobar bronchopulmonary sequestration. S. T. Gerrard, et al, New England Journal of Medicine, 259:662, Oct. 2, 1958.

II. Peripheral Stenoses of the Pulmonary Artery

7. Pulmonary hypertension and a continuous murmur due to multiple peripheral stenoses of the pulmonary artery. W. G. Smith, Thorax, 13:194, September, 1958.
8. Peripheral stenoses of the pulmonary artery. Gullensward, et al, Pediatrics, 19:399, March, 1957.
9. Pulmonary artery stenosis. M. B. Vermillion, Circulation, 17:55, January, 1958.

III. Miscellaneous Abnormalities of the Pulmonary Arteries

10. Pulmonary artery ring. H. B. Hiller, Acta Radiologica, 48:434, 1957.
11. Anomalous course of the left pulmonary artery; a cause of obstructive emphysema in infants. Sherman, S. E., Journal of Pediatrics, 54:93, January, 1959.
12. Primary pulmonary obliterated vascular disease in infants and young children. D. S. Husson, et al, Pediatrics, 23:493, March, 1959. This article includes an excellent bibliography with 45 references.

IV. Pulmonary Arterial-Venous Communication

13. Arterio-venous aneurysm of the lung. J. W. Murrie, et al, American Journal of Surgery, 89:265, 1955. This is an excellent review of the older literature and has a bibliography of 101 references.

Page 2.

14. Congenital pulmonary arterio-venous aneurysms. R. D. Sloan, American Journal of Roentgenology, 70:183, 1953. Good review article with 89 references.
15. Pulmonary telangiectasia. Report of a case proved by pulmonary biopsy, D. Cooley, et al, Journal of Thoracic Surgery, 27:614, 1954.
16. Pulmonary A-V fistula in sisters. C. E. J. O'Neil, et al, Journal of Thoracic Surgery, 31:286, 1956.
17. Multiple pulmonary A-V fistulas. L. L. Alexander, et al, New York State Journal of Medicine, 55:2307, 1955.
18. Pulmonary A-V aneurysm. G. S. Husson, Pediatrics, 18:871, December, 1956.
19. Hereditary hemorrhagic telangiectasia and pulmonary arterio-venous fistula. Survey of a large family. C. H. Hodgson, et al, New England Journal of Medicine, 261:625, September 24, 1959. An excellent review article with 71 references.
20. Multiple small A-V fistulae of the lungs. M. R. Hales, American Journal of Pathology, 32:927, 1956.

V. Anomalous Pulmonary Venous Drainage

21. The development of the pulmonary veins. Catherine A. Neill, Pediatrics, 18:880, December, 1956.
22. Transposition of the pulmonary veins. A. S. Nadas, et al, Circulation, 18:117, July, 1958. This is a very excellent review article with 43 references.
23. Infra diaphragmatic total anomalous pulmonary venous connections. A. J. Johnson, et al, Circulation, 17:340, March, 1958.
24. Surgical treatment of 35 cases of drainage of pulmonary veins into the right side of the heart. S. C. Spencer, et al, Journal of Thoracic Surgery, 36:777, December, 1958.

VI. Obstruction of Pulmonary Venous Return

25. Congenital stenosis of the pulmonary veins at their atrial junction. Sherman, S. E., et al, American Heart Journal, 56:908, 1958.
26. Extra pulmonic stenosis of the pulmonary veins. J. Bernstein, et al, Circulation, 19:891, June, 1959.
27. Cor triatriatum. J. E. Edwards, Pediatric Clinics North America, 1:27, February, 1954.
