DALLAS--Dr. Parkhurst A. Shore, professor of pharmacology at the University of Texas Southwestern Medical School at Dallas, is a member of the conference faculty for the June 12-14 Conference on Applications of Newer Physical Techniques to the Study of Drug Metabolism in Maryland.

Participants at the conference will discuss a new range of analytical techniques which are now being used to separate, identify and measure drugs and other foreign substances present in biological materials. In some instances, detection of one part of a given substance in a trillion parts of material, is possible.

The conference scheduled by the Committee on Problems of Drug Safety, Drug Research Board, Division of Medical Sciences, National Academy of Sciences--National Research Council, will be held at the National Bureau of Standards at Gaithersburg, Md.
