DALLAS--One of the world's authorities on taste will present a lecture before the North Texas Chapter of the Society for Neuroscience Tuesday, April 10.

Dr.Lloyd M.Beidler of the Department of Biophysics at Florida State University will detail some mechanisms of taste and new agents which are able to modify that sense.

Dr.Beidler's talk will be presented at 8 p.m. Tuesday at Callier Hearing and Speech Center, 1966 Inwood Rd.

The scientist has been a member of the panel for selection of National Science Foundation Fellows, a member of the Optical Society, Physiology Society, Biophysical Society and others. Educated at Muhlenberg College and Johns Hopkins University, his major research interests are sensory physiology, physiological properties of chemoreceptors, mechanisms of taste stimulation and olfaction.
