\*\*\*\*\**Top specialists in the burn care field will speak on initial care of burn patients, reconstructive surgery and the psychology of burn children at an intensive seminar for nurses in the care of the thermally injured Nov. 11-15.*

DALLAS--Foremost specialists in the field of burn care will be featured at an intensive program for nurses in the care of the thermally injured to be held in Dallas Nov. 11-15.

Sponsored by the College of Nursing, Texas Woman's University, and The University of Texas Health Science Center at Dallas, the seminar will be led by Dr. John A. Moncrief, professor of Surgery at Medical University of South Carolina; Dr. Basil A. Pruitt, director of the Institute of Surgical Research at Fort Sam Houston, Texas; and Dr. Charles Baxter, professor of Surgery at Southwestern Medical School and head of Parkland Memorial Hospital's Burn Unit. Parkland and the Institute of Surgical Research are the two major burn care facilities in Texas.

Program topics include initial care of burn patients, reconstructive surgery, principles in planning a burn unit and the psychology of burn children.

Two hours continuing education credit is given at TWU College of Nursing for the course.
