THE KOHA EXPERIENCE: AN ACADEMIC LIBRARY PERSPECTIVE

Jon Crossno, Cataloging & Metadata Librarian

Cameron Kainerstorfer, Manager, Digital Collections

Health Sciences Digital Library & Learning Center University of Texas Southwestern Medical Center Dallas, Texas

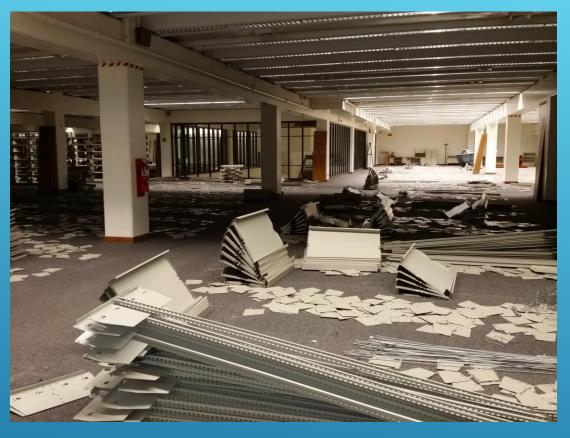

- > 30 full-time employees, including 5 cataloging staff
- > 260,000+ physical volumes in various formats
- > 8,800+ circulations
- > 12,600+ in-house uses

LIBRARY STATISTICS (PRE-MIGRATION)

- ▶ 1993—began using SirsiDynix
- ► Fall 2013—catalog replacements reviewed by library group
 - Atrium
 - Koha
 - WMS with WorldCat Local
- January 2014—Koha selected as catalog replacement
- ➤ July 2014—Staff training from ByWater
- ➤ July 2014—Academic reserve cleanup & transfer
- August 2014—New Koha catalog launched

TIMELINE

REAL LIFE INTRUDES

- 2013 and beyond—Stacks removal project
 - Separate DB created from catalog data for this project
 - Summer 2013—Weeding "test drive" (8,000 items)
 - August 2013—library card registrations stopped
 - April 2014—journal and monograph spaces repurposed
 - April 2014—MARC records sent to Joint Storage Facility (JLF)
 - August 2014—Koha catalog launched
 - August 2015—History of medicine content reduced
 - December 2016—More "resource in common" items claimed at JLF

TIMELINE, CONTINUED

- ► Alternative ILS Search Project—REQUIRED COMPONENTS
 - Meets financial guidelines
 - Provides inventory control
 - Manages all formats (including print, databases, ebooks, & digitized archived items)
 - Intuitive search interface
 - Reporting
 - Support
 - Interoperability with ILLiad*
 - Web-based interface for clients

TO KOHA OR NOT TO KOHA...COMPONENTS

- Alternative ILS Search Project—OPTIONAL COMPONENTS
 - Web-based interface for staff
 - Faceted browsing (results sorting based upon filters)
 - Vendor-hosted solution
 - Circulation*
 - Search analytics
 - Social Networking
 - Client database*
 - Interoperability with LDAP authentication

TO KOHA OR NOT TO KOHA...COMPONENTS

- ByWater Solutions demos (OPAC and staff interfaces)
- Bernard Becker Medical Library Catalog
- UT Tyler Robert Muntz Library Catalog

TO KOHA OR NOT TO KOHA...HELPFUL SITES

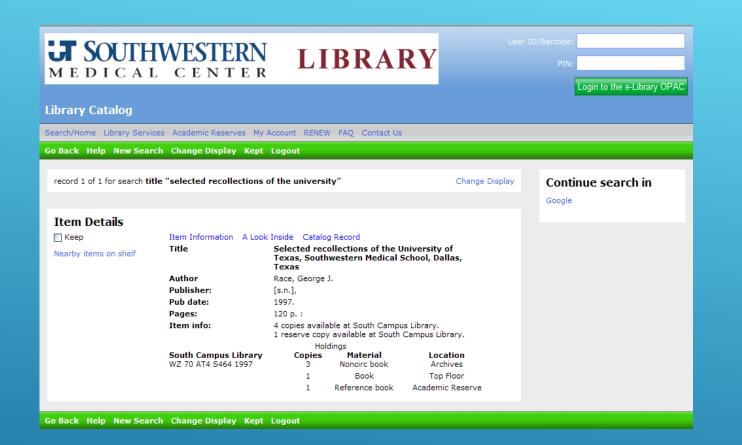

SirsiDynix (local server)

- Proprietary system
- Almost no access to database schema
- Hardware issues—UNIX box with no support going forward
- System updates/upgrades out of sync
- Difficult to maintain and update bibliographic data using reports:
 - Retrieve data
 - Make changes
 - Verify changes

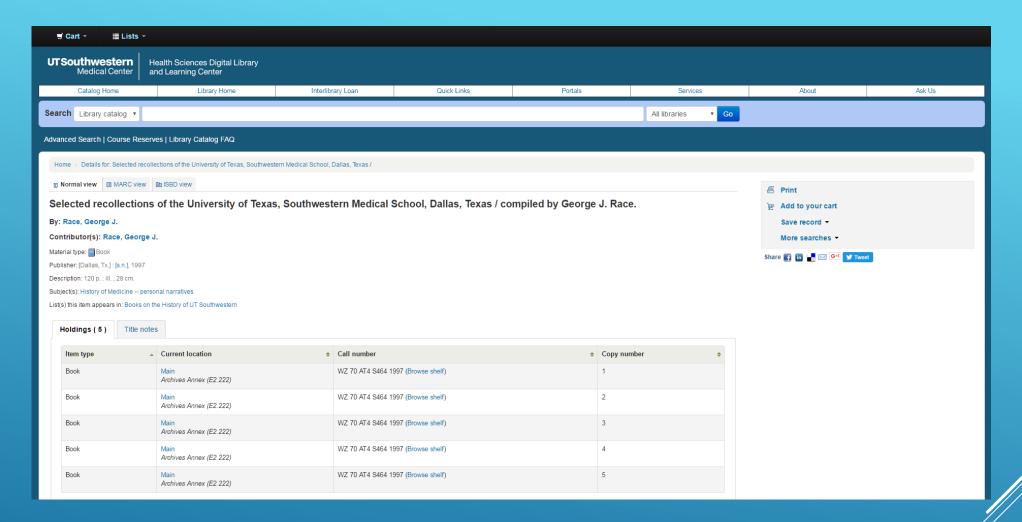

Koha (hosted by ByWater)

- Open source
- Full access to database schema
- Updates/upgrades regularly scheduled
- Easy to maintain and update bibliographic data:
 - Unlimited customizable reports
 - Simple tools to make and verify changes

PRODUCT COMPARISON

SIRSI DYNIX

- Transition to digital library
 - Most print materials transferred to off-site location
 - Many print materials removed completely
- Closing of patron database
- Staff reductions and/or role changes
 - Limited library staff
 - Greater reliance on ByWater Support for assistance

CHALLENGES DURING MIGRATION

- ▶ 80,000 bibliographic records
 - ▶ 10,000 bibliographic records for items remaining "in-house"
 - > 70,000 bibliographic records for items transferred off-site
- Location & item type changes
- Journal holdings notes
- > OPAC customizations
- Library staff education
- > Patron education

MIGRATION EXPERIENCE

- Reporting is so much easier
- Cataloging functions are streamlined
 - MARC imports
 - Batch item deletion/modification
 - Greater reliance on up-to-date records for ebooks & ejournals in the catalog
 - Ability to feature content not owned or managed by the library (President's Lecture Series videos in Vimeo; ACE/Skillsoft/Books24x7 professional development resources through another department)

WHAT WORKS WELL?

- "Cart" causes staff/patron confusion
- Web interface customization requests from staff
- ▶ Interlibrary loan connections...or the lack of them

WHAT DOESN'T WORK WELL?

- Use of Google Analytics to identify marketing that works
- Banner updates for catalog to tie in with marketing efforts
- More active use of lists to highlight themed e-collections
- ▶ OCLC and HathiTrust inclusion

FUTURE PLANS

- Identify trends in your library and how they affect what you need from the catalog
- Extreme weeding—not yet an Olympic sport, but it should be
- Review your location descriptions
 - Some may be due to previous system limitations
 - Migration is a good opportunity for change

MIGRATION TIPS
