*****"Human Individuality and Disease"
to be presented Dec. 17.

DALLAS--Dr. Arno Motulsky, director of the Center for Inherited Diseases at the University of Washington, will visit The University of Texas Health Science Center Dec. 14-18 as the Mr. and Mrs. I.G. Bromberg Visiting Professor of Medicine.

He will present the Bromberg lecture on "Human Individuality and Disease" Dec. 17 at 11 a.m. in the Richardson Lecture Hall (Room D1.502).

Head of the Division of Medical Genetics and director of the Medical Genetics Training Program at the University of Washington, Motulsky is also professor of genetics at the University and professor of medicine at University of Washington School of Medicine. He has been on the faculty at University of Washington since 1953 except for the year 1976-77 when he served as visiting professor of medicine at Stanford University Medical School and fellow in the Center for Advanced Study in the Behavioral Sciences at Stanford.

A member of numerous scientific societies, Motulsky has served as president of the American Society of Human Genetics. And for the last four years he has been a member of the Board of Directors of the Institute of Society, Ethics and the Life Sciences. In 1976 he was honored by election to the National Academy of Sciences. He received the Martin Luther King, Jr., Medical Achievement Award for outstanding contributions in the research of sickle cell anemia from the Southern Christian Leadership Conference in 1972.

Motulsky is currently the editor of "Human Genetics," "Abstracts on Medical Genetics, Reference and Index Services," "Progress in Medical Genetics" and "Oxford Monographs on Medical Genetics."

He serves on numerous editorial boards and international and national committees including the President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research.

The Department of Internal Medicine at the health science center annually hosts such outstanding physician through the Bromberg professorship.
