THE UNIVERSITY OF TEXAS HEALTH SCIENCE CENTER AT DALLAS

southwestern medical school ■ graduate school of biomedical sciences ■ school of allied health sciences

Contact: Ann Harrell

DALLAS--First class in a new program in health care administration will enter The University of Texas School of Allied Health Sciences at Dallas in August, 1974. According to Dr. Donald A. Pool, chairman of the Department of Rehabilitation Science, the two-year upper division program will lead to a bachelor of science degree.

The new degree plan will combine a core of rehabilitation sciences courses with new offerings in the areas of aging, the handicapped, and rehabilitation facility and nursing home administration, he said. Aim of the program is to prepare graduates for administrative work in long-term care facilities, rehabilitation facilities and in related professional positions, as well as to prepare those who want to do further work in the field for graduate school.

Directing the program will be Frances L. Price, Ph.D., assistant professor of rehabilitation sciences.

The health care administration degree plan was developed in part under a special improvement grant from HEW.
