DALLAS--Two freshman medical students at The University of Texas Southwestern Medical School have been awarded \$1,000 stipends by the Pharmaceutical Manufacturers Association Foundation.

Steven N. Brooks, son of Mr. and Mrs. Howard Nelson Brooks of Dallas, and Anthony C. Jung, son of Mr. and Mrs. Eugene A. Young of Fredericksburg, are undergoing training in clinical pharmacology during the summer.

Brooks and Jung are among 20 students given these training awards this year by the PMAF.

Foundation Executive Director Thomas E. Hanrahan said the awards are aimed at acquainting the students with the basic scientific and technical knowledge applied in clinical pharmacology. Since the program was started in 1967, awards have been made to 135 (including these 20) medical students throughout the United States.

Dr. Andres Goth, chairman of the Department of Pharmacology, noted that only Southwestern and Howard University had two students receiving the grants.

The Southwestern students are working with Dr. William A. Pettinger, associate professor of Pharmacology and Internal Medicine.
